

One time dispenser of Mixed Solid waste with plastics and wet waste developed by CSIR-IICT to recycle unsegregated waste and reduce volumes

Convert 500 Ltr of Plastic & or unsegregated green waste each batch of 2 hours to **Furnace oil** and **Ash** and reduce the spread of One Time Plastic to the maximum possible extent

Ideal for all Bulk waste Generators like Gated Communities, parks, Offices etc to recycle the unsegregated green waste to comply with New MSW norms

Comes in a small foot print and reduces the problem faced by all ULB to treat 2 Tons/ day Un segregated waste

Affordable Sustainable Solution

Use the Furnace oil for Boilers and the ash for Bricks

The same unit can also be used to make exclusive green waste to Bio Char for agricultural needs
